Time Log Sheet

Scene / Clip name	Start time	End time	Time	Tape number
car race in town	00:13:36;10	00:14:19;06	43 sec's	tape 5

How to use the time log

After shooting your footage label up tapes i.e. Name of project and tape number.

Play back your tapes on your camera. You should see the time code in the corner of the camera screen. Make a note on the Time Log Sheet of which scene you wish to capture, as you might have don 2 or 3 take.
This will save time and disk space later on in your project if you need to re-capture work.

Time Code:

How much space will I need on my Mac?

How much space will I need on my Mac to capture and edit my work?

DV format
1 min = 216 MB or 1 CD
10 min's = 2.16 GB or 4 CD's
60 min's = 13 GB a lot of CD's
