

Greg's "sci-fi" (science first!) Fanatical Wacko-ness in Texas!

TEXAS REMAINS A HOTBED OF INTELLIGENT DESIGN PROPONENTS WHO CORRUPT TEACHING SCIENCE!

DECEMBER 9, 2007

No Fun Again!

Looks as if the starter needs to be replaced on the TS110. We had to pull start it again today as I couldn't get the engine to crank over at all. Going to try one more trick before I give up. Going to put a magnetic heater on the starter in the morning and warm the motor up before trying to use it. Hate winter! Just hate it. If it isn't one thing, it's two more.

OK folks, get THIS!
The Director of SCIENCE curriculum for the Texas Education Agency, Chris Comer, was forced to resign because she *appeared* to endorse the Theory of EVOLUTION!

Wow! Imagine that! No evolving in Texas! How 'bout DE-volving?

A scientist who "appears" to endorse a scientific theory! Forced to resign! AND... she was turned in by a former legislative adviser to President Bush during his Texas governorship and later a Department of Education appointee Lizzette Reynolds, who is now a Texas Education Agency adviser. This from the *Austin-American Statesman* "the agency is enforcing a political doctrine of strict conservatism that allows no criticism of creationism." Talk about radical religious fundamental extremism! We have our own version of the Islamic extremists right here.

Poetic Wisdom of Eery Grim Ogre

I am the Walrus (revised)

I am the cows' god (yet they are the ones worshipped by so many others)
 I am the cows' slave (yet my masters are in my power: who lives, who dies, and when.)
 I am the dairyman (yet they are the universal mothers, the REAL milk producers.)
 Cow Cow Ca Chew! (Cud, ya know? Chew the Cud? well I thought it was humorous!)

Eery Grim Ogre

The name Meier means "Dairy Farmer", can you say predestination!

(*from the Germanic Surname Lexikon 2 - Meier/Meyer/Maier = dairy farmer; landowner)

Greg Re-emphasizes!

DON'T BE DISTRACTED!

The Iraq War is but the tip of the iceberg! Our kids will be paying for this administrations follies for decades! Just denying global warming for 6 years may be a major disaster! Gains made across the board by previous administrations have been systematically gutted or reversed in almost every field of interest for the last 7 years! Welcome to the era of George Bush, Worst President in the History of the United States of America! Heaven help us all!
