the U-1000 Products

Safe packaging for all applications
Environmentally responsible materials
Easily and affordably customized

Univenture's quality engineered U-1000 polypropylene sleeves offer superior disc protection with our patented Safety-sleeve® construction in a wide variety of products.

-  100% recyclable, chemical resistant poly
-  Less expensive than traditional vinyl sleeves
-  Lighter weight than most packaging alternatives

Unlimited combinations can be custom-designed and manufactured according to your packaging requirements.

- Simple disc sleeves – alternatives to paper and Tyvek®
- Page sleeves – for binders and wallets
- Disc sleeve mailers – for safe and cost effective direct mail

Easy options make versatile Safety-sleeves® perfect for virtually every packaging project.

- Adhesive backing – for bundling in books or manuals
- Tamper-resistance – tamper evident package options
- Window cut variations
- Pocket variations for insertable graphics
- Printing on poly or sleeve material reduces additional package inserts
- Double polished, matte, clear and colored poly
- Variable hole spacing for page sleeves including hang tab hole on new UniP.O.P.™

Tyvek® is a registered trademark of DuPont.

the U-1000 System

Fully automated
Flexible configuration
Totally integrated

This unique and fully automated packaging system significantly accelerates package production through innovative and efficient manufacturing technologies. Our staff of engineers is dedicated to researching and designing the best packaging solutions in the industry. All dies and ultrasonic welding features are designed to exact specifications with the goal of producing the flattest, most uniform product possible.
