THE PRODUCT

- PRINT ONLY :** Loose prints protectively packaged - sold as is
- MATTED :** Prints are mounted and matted to a finished size and sold in a protective enclosure ready to be framed.
- FRAMED :** Prints are mounted, matted and framed in a frame of your choice (silver or black). This is a finished product ready for hanging.
- STANDOUT :** Prints are mounted to a 3/4" rigid board and laminated for protection. Edges of the board are black and the two largest sizes are available on a 1 1/2" board. This is a finished product ready for hanging.
- CANVAS :** Images are printed on canvas and hand stretched over a wooden frame and coated for long lasting protection. This is a finished product ready for hanging.

PRINT DETAILS

All prints are printed on 'Fuji Crystal Archive printed with Chromira', the ultimate in high end, true photographic printing (gloss)

Also available are prints on Fuji flex 'SuperGloss'. This is the glossiest paper you can use - there's no other material like it! SuperGloss offers the deepest and richest colors, and incredible shadow detail. It practically glows with light from within. SuperGloss prints are 10-15% more expensive, see gallery pricing.

Prints 11x14 and smaller are mounted on a neutral styrene board, matted with 'Alphamat' conservation grade mat-board. Prints 16x20 and larger are mounted on Gator board.

Bermuda's environment is extremely difficult to frame and mount for. The high humidity and temperatures mean that only the toughest materials and best techniques can withstand these conditions. Each piece sold is mounted and matted to the highest standards.

All sales are final and are assumed free of defect upon receipt. Returns can be made within 7 days if you if you feel the quality is unsatisfactory. All prices are subject to change without notice in any way.
