

Your class is planning a [habitat garden](#) for your school. One goal is to plant native plants and trees.

4. What factors should you consider when selecting the trees?

Which trees do you recommend they plant?

5. The habitat garden will be on the side of your school that faces south. Trees planted there can shade your building during the hot days of the year. [Which kind of trees](#) should be planted so that the winter sun can still shine on the south side of the building?

Why did you select these trees?

6 . [Plants and People](#) - Look up one of the trees in the story in this web site. Write a way that people have used the tree.
