

The task ahead will be difficult just as building anything worthwhile always is. If you are faced with opposition, remember the millions before you who also confronted daunting obstacles while pushing humanity to higher levels of conscious evolution.

You must never view your journey at hand as a hopeless one. Just as slavery as an institution was dismantled in the 19th century, women given their right to vote and the Iron Curtain lifted without a mushroom cloud, so too can you succeed in the coming world wide revolution, ending threats of self destruction through the establishment of a global country dedicated to peace, prosperity and reaching humanity's highest potential.

For those of you who read this and are not yet committed world citizens, I believe it was your fate to be confronted with my message. The search for humanity's spiritual DNA can finally come to an end. You are an important cell within the Earth

body who must awaken to your true purpose.

Now you must go and do everything in your power to help speed the transition to your destiny; one people, one world, united and indivisible with liberty and justice for all.

The president's first name means wisdom. It's what we'll all need to reach the next stage in humanity's evolution. The last name Alexandria references the mistakes of the past as something we shouldn't forget for the sake of our future. Alexandria, Egypt was once the most modern city in the world, containing collective treasures of knowledge that were destroyed and had to be rediscovered a thousand years later after a long detour through an unnecessary dark age. The internet is the Alexandria, Egypt of the 21st century that promises us the tools needed to build a brighter world as well as those capable of tearing it down. The choice is ours and now the time has come for us to make the right decision.

MESSAGE FROM THE PRESIDENT OF THE
UNITED STATES OF EARTH:
SOPHIA ALEXANDRIA

I send these greetings from the future to you in your present time. I call upon those who will listen to this message, intending to set in motion a future for our world in which my time line intersects yours. Even if its existence is in question since I have not been born yet, please do not dispute the urgency of this moment. The actions you take from this day forward have the potential to help free us from the bondage of a new dark age, threatening to hold our future captive in the chains of a devastated past.

I cannot explain in ways you will understand how this message was delivered to your time. What is important is that you understand why. The culmination of my time line to a united Earth at peace and prosperity is not yet a certainty. The environmental damage from the misdeeds of your generation jeopardizes our future with pointless suffering and extreme hardship. The climate crisis isn't the only threat to our species and planet. Humanity is in danger of igniting a world war that could claim well over a billion lives and send survivors reeling through an unnecessary detour of hell on Earth.

I regret that this potential nuclear conflict is already taking form. This nightmare is something we can all prevent together if we take appropriate steps and move forward in the right direction.

Many of you are most likely awake enough to see that a hundred and ninety-five imbalanced nation states refusing to recognize a global country is a recipe for anarchy, environmental

collapse and world war. If you can see the insanity of your Earth's disorder while being able to visualize a more perfect union and saner order, there is still hope.

President Sophia Alexandria

We wish to commend and encourage those of you who awaken to your true identity as citizens of the world. By now you must see the warning signs of approaching turbulent times marked by threats of great wars and environmental upheaval. Do not let these possibilities bring despair or intimidation.

As a world citizen, The United States of Earth stands behind you with this assurance; blinded political leaders and their henchmen who ignore your true identity while forcing conformity to their internationally lawless, racist, nationalistic ideologies of greed, genocide and endless war, have no power capable of stopping an idea once its time has come. The time for a United States of Earth is swiftly approaching and this idea will continue to grow in power as the destructive consequences of your fragmented civilization can no longer be ignored.

It is with regret that we are unable to provide for your protection in the midst of chaotic times ahead. We are instead relying on your courage and unflinching commitment to the truth so that you may be vehicles of the global revolution to come.

Be steadfast in your resolve to stand up for future generations who are awaiting you; the global founding fathers and mothers to frame an integral system of governance, calling humanity to a more encompassing future.
