5 - Option+click Add button to add a template folder			
6 - Option+click Print button to bypass Print dialog			

Find Panel Rules and Cross Panel Searches

"Contains": images containing any words typed (x OR y)	Add the prefix "!" to any word to exclude it from the results.
"Contains All": images containing all words typed (x AND y)	"+" at beginning of any word triggers the "Starts with" rule for just that word
"Doesn't Contain": images that don't contain any words typed (NOT x OR NOT y)	"+" at end of any word triggers the "Ends with" rule for just that word
"Starts With": images that contain all of the word beginnings typed (x... AND y...)	
"Ends With": images that contain all of the word endings typed (...x AND ...y)	
Cmd+click or Shift+click to select multiple items in any individual panel list or across multiple panel lists. If you have multiple items in a single panel list selected then they are combined in the search as an OR , and if you have multiple items selected across different panel lists they are combined using an AND search.	
The Metadata Browser has its own special rules: each of the top-level categories that it contains act as if they are separate lists when it comes to how the search is built. So, with a few Cmd+clicks you can build complex searches like: (folderA, folderB, or folderC) and (keywordA, keywordB, or keywordC) and (January/2005) and (CityA or CityB) and CameraA	

SLIDESHOW MODULE
