Notes & Miscellaneous Shortcuts			
1 - Caps Lock button activates auto next image when rating, flagging & labelling			
2 - Alt+click side panel name to toggle On/Off Solo Mode			
3 - Ctrl+click side panel name to open/close all panels			
4 - Shift+click to open/close additional panels			
5 - Alt+click Add button to add template folder			
6 - Alt+click Print button to bypass Print dialog			

**Find Panel Rules and Multiple Panel Searches**

"Contains": images containing any words typed (x OR y)	Add the prefix "!" to any word to exclude it from the results.
"Contains All": images containing all words typed (x AND y)	"+" at beginning of any word triggers the "Starts with" rule for just that word
"Doesn't Contain": images that don't contain any words typed (NOT x OR NOT y)	"+" at end of any word triggers the "Ends with" rule for just that word
"Starts With": images that contain all of the word beginnings typed (x... AND y...)	
"Ends With": images that contain all of the word endings typed (...x AND ...y)	

You can Ctrl+click or Shift+click to select multiple items in any individual panel list or across multiple panel lists. If you have multiple items in a single panel list selected then they are combined in the search as an **OR**, and if you have multiple items selected across different panel lists they are combined using an **AND** search.

The Metadata Browser has its own special rules: each of the top-level categories it contains act as if they were separate lists when it comes to how the search is built. So, with a few Ctrl+clicks you can build complex searches like: ( folderA, folderB, or folderC ) and ( keywordA, keywordB, or keywordC ) and ( January/2005 ) and ( CityA or CityB ) and CameraA
