<sup>1</sup>Laboratory sections can be added for an additional credit. Added laboratory sections count towards fulfillment of Massasoit's lab science requirement. The lecture sections are pre/corequisites for the laboratory sections.

<sup>2</sup>A grade of C- or better in Biological Principles I or successful completion of the Biology Challenge Exam is a prerequisite for this sequence.

<sup>3</sup>200-level biology courses do not always count towards the biology major at four-year schools in the area.

<sup>4</sup>Anatomy & Physiology and Microbiology should **NOT** be taken concurrently. Both require substantial lab work beyond scheduled class times.

<sup>5</sup>A grade of C- or better in Anatomy & Physiology I is a prerequisite for Anatomy & Physiology II.
