Welcome to our "No Fuss No Risk Wine List"; no pretense, no ritual, no ice buckets, no problem. You will not see any wines named Chardonnay or Cabernet Sauvignon on this list; we feel that most wines with "The C Name" in this price range are all market hype and no substance. We prefer to enjoy lesser known and more interesting grapes at half the price (don't think that the winemakers are sitting around drinking from their cash cows either). No one expects you to recognize many of these wines, we have arranged them roughly in order of body and have priced them at almost retail, so that it won't be too costly to experiment - rest assured each wine on this list has been chosen by some of the most egregious wine snobs in the city - you simply cannot pick an ugly bottle. Your service person will be happy to help you muddle through and remember, you may take any unfinished portion home with you.

Wines by the Glass
