

The Legal Stuff

These programs are protected by copyright, i.e., © 2005, 2006, 2007, N.W.J. Hazelton.

However, they are made available as “Some Rights Reserved” software.

The programs (“the work”) are licensed under the Creative Commons Attribution 3.0 License. To view a copy of this license, visit <http://creativecommons.org/licenses/by/3.0/> or send a letter to Creative Commons, 171 Second Street, Suite 300, San Francisco, California, 94105, USA.

They are supplied without warranty as to their fitness for any purpose. You use them entirely at your own risk. You should test them thoroughly before use and make sure that you understand them prior to using them for anything serious.

You can copy, use and distribute the programs freely. You can also change them and combine them as you need. You cannot charge for them as they are. You cannot sell them for profit, but may reclaim a reasonable (and small) charge for copying and distribution. If you add value to them, you can recoup that investment of your time, but you cannot charge for these programs, i.e., the ones I have written and distributed, even when they are within yours, i.e., you have to separate out what value you add from the value that these programs have.

It would be nice if you shared any modifications or developments of these programs in the same way that I am sharing them with you, but this is not a requirement.

The primary objective of these programs is to help with the education and training of surveyors and geomatics engineers. You are encouraged to use them for this purpose, as Education Open Resources. They are also designed to help people solve real problems without a whole license song and dance.

If you distribute these programs, you must include a copy of this document with the distribution and attribute the source of the programs.
