

Each One Teach One
Solar Motion

Name _____
Date _____
Per _____ Table _____

To the Student:

Take your Solar Motion Demonstrator (SMD) home and show your parents/guardians how to use it. (If you would like to show it to others that is okay, but you are required to explain how to use the SMD to your parents/guardians.) You may also show them your class activity as an aid or any handouts to help them understand the use of the SMD.

Have your parents fill out the “parent comment” portion of this form and **return** it by Friday, February 15, 2008.

To the Parents/Guardian:

Teaching others helps to build a sound foundation of the concept to be learned.

In science class we learned how to use the Sun Motion Demonstrator (SMD). On the next test, your child will be asked questions about Sun/ Earth relationships. Using the SMD and teaching others (you) how to use it will give them a greater understanding of these relationships.

Your son/daughter is going to show you how the SMD can be used to help explain various sun/earth relationships. (Good Luck!)

.

It is not my intent to give you extra work. I want to extend an opportunity for you to see how your son/daughter does with this type of activity.

Thank you!

Mrs. Hudson – 8th grade science

Room for parent comments: (How did it go? How did you do? What do you think of the SMD?)
