

Adding your feed to iTunes

*This is important, how to verify that your podcast works,
A must do!*

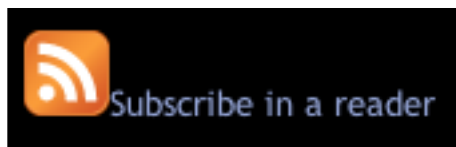

By Steve Sloan

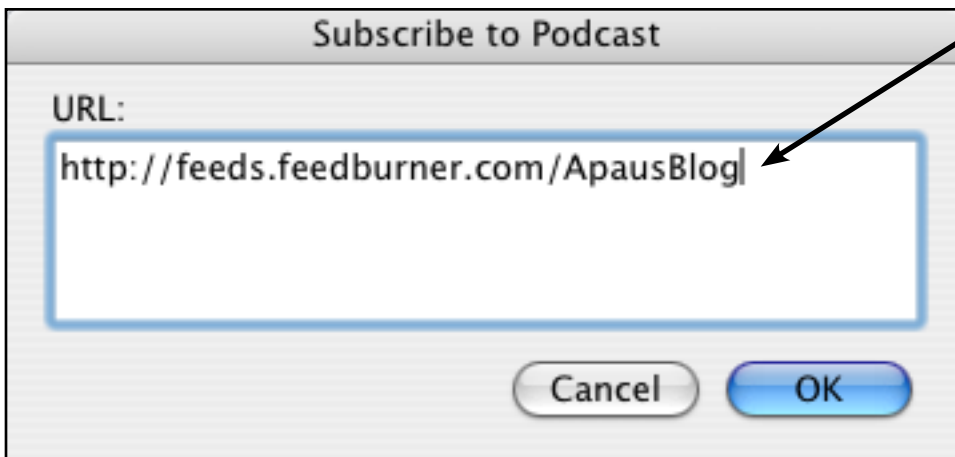

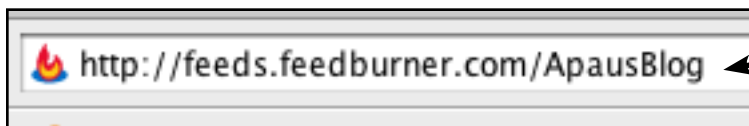

Be sure the computer you are using has iTunes on it. If not download it from the Internet. On a Mac or a PC, open iTunes. Under the Advanced menu select Subscribe to Podcast...

This will open a "Subscribe to Podcast" box to paste in a URL. Leave this open for now and go open a Web browser.

With your Web browser go to your video blog (vlog) on Blogger. Click on your "Chicklet" and then copy the URL that will come up in your browser.

Now, go back to iTunes and the open "Subscribe to Podcast" box. Now paste in the URL. Then, click OK.

Your Podcast must now load into iTunes and you MUST be able to view your episode(s). If you cannot then you have a problem podcast...

If you can't see the show, there is a problem, you know. Since you will be presenting your final from iTunes you need to fix it. It is strongly recommended you make an appointment to get this fixed!
