

## Parking Lot Guidelines

**How does the drop and pick up system work?** This parking lot flow has been established in order to provide safe movement of vehicles through the parking lot. The diagram below shows the traffic flow to provide for greater safety and less frustration for all.

PLEASE PARK AT ALL TIMES for delivery and pick-up of your students.  
NO IDLING IN THE THROUGHWAY.

FOR DELIVERY: Park, so that your students may unload as slowly as they need to or as quickly as they desire without blocking traffic flow.

FOR PICK-UP: Park. Advise your students to wait outside the door to watch for their ride. Make sure they bring their winter wear for standing in the cold.

Then, pull out of your parking space and continue moving in the same direction. This will take you around the front of the church rather than going back the way you came. (See diagram below.)
