**ACDSee:** A fast image viewing and management tool that lets you view, browse and organize your digital pictures and multimedia files extremely fast and comes with TWAIN image acquisition support for scanners.

**Art Rage:** An easy to use, stylish painting package that doesn't force you to learn complex tool settings - it just lets you get right down to painting with tools you already know how to use.

**Art Text:** Create high quality textual graphics, headings, logos, icons, web site elements and buttons. Use the result with Apple iWork, iWeb, Microsoft Office and various other text edit and web design programs.

**Comic Life:** Create astounding comics, beautiful picture albums, how-tos... and more!

**Comic Life Magiq:** A Quantum Evolution of Comic Life with a range of Templates, Props, Balloons and Spraycans

**Doozla:** Easy-to-use drawing application for children.

**EazyDraw:** An illustration application that offers vector-based graphics editing and creation capabilities for creating simple not-photographic drawings, technical diagrams and illustrations such as logos, icons, buttons and stylized art.

**GIMP** - GNU Image Manipulation Program: It can be used as a simple paint program, an expert quality photo retouching program, an online batch processing system, a mass production image renderer, an image format converter and more.

**Google SketchUp:** Use to create, modify and share 3D models.

**Image Buddy:** A digital image layout program designed especially for use on the Mac that is quick and easy to use.

**Image Effect Trees:** A new, powerful, nondestructive, image editing program which unlocks the power of Apple's Core Image technology. It NOT a general purpose paint/draw program. IET is designed to combine images and text with effects, effects with other effects, and stacks of multiple effects with other stacks of multiple effects, thus creating an effect tree.

**Image Framer:** Over 60 photorealistic and artistic frame designs that can be applied to your photos. Plus you can add your own frames.

**Image Tool:** A utility to scale images and convert image file formats.

**Image Tricks:** Edit and generate images using Mac OS X Core Image filters that transform pictures to unimaginable extent and apply advanced visual effects.

**ImageWell:** A small, but powerful, image editing application that lets you quickly resize, crop, watermark, edit your images, take screenshots and then instantly upload them to the web, save to your computer or email them to a friend.

**iMaginator:** The ideal partner for any digital camera. Allowing your creativity behind the lens to continue unhindered on your Mac - add text & paint too! Non destructive Image editing in real time. From simple image correction to out-of-this-world effects. Made simple!

**Inkscape:** Vector graphics editor, with capabilities similar to Illustrator and CorelDraw, using the W3C standard Scalable Vector Graphics (SVG) file format.

**Intaglio:** Carries the legacy of MacDraw into the modern Macintosh world by combining ease of use with the power of Mac OS X graphics. Intaglio retains the feel of MacDraw while harnessing the full capabilities of Quartz and CoreImage.

**iPaint:** Modern Open Source paint application for Mac OS X.

**iWatermark:** Stylishly Copyright all your images in just minutes. Integrated to work with Photoshop, ACDSsee, iPhoto and other photo organizers.

**Jade:** Uses state of the art algorithms to enhance image colors, contrast and dynamics, while preserving the overall quality of your images.

**LineForm:** A clear modern Mac alternative to Illustrator, FreeHand, and other more costly or bloated vector drawing apps.

**MagicBrush Photo:** Instead of worrying about histograms and color profiles you can focus on applying pixel-precise effects and corrections to your photos. With MagicBrush-Photo, you simply create a change, "dip" your virtual brush into it, and paint it onto your original image.

**PaintBrush:** A Cocoa-based paint program for Mac OS X, similar to Microsoft Paint and the now-defunct MacPaint, that aims to fill the need for a basic, streamlined editor for those times when you just feel the need to doodle.

**Photo Acute Studio:** Process sets of images taken in continuous mode to produce high-resolution, low-noise pictures. It increases image resolution, removes noise without losing image details, corrects image geometry and chromatic aberrations and expands the dynamic range.

**Photo Wrangler:** Easy-to-use utility for sorting digital image files into one or more selected folders using a simple slideshow-like interface.

**Picturesque:** Make images look gorgeous for the web. With an animated "drag and drop" style interface, Picturesque makes images gorgeous with tasteful effects like 3D perspective, reflection, glow, shadow, curve, and stroke in less time than it takes to open Photoshop.

**Pixelmator:** Easy-to-use, fast and powerful image editor for Mac OS X has everything you need to create, edit and enhance your images.

**Portrait Professional:** Intelligent retouching software for portraits.

**Posterino:** Provides a solution for the common problem we face in the age of digital images: We shoot a lot of marvelous pictures, bury them deep down in the file system of our computers and most of them never see the light of day again. The solution is simple: Compose a "best of" poster every couple of months and pin it on the wall in your hall. This will make you happy every time you walk by, and it will be a great eye-catcher for your friends and family too.

**Seashore:** Image editor for Mac OS X's Cocoa framework, featuring gradients, textures and anti-aliasing for both text and brush strokes. It supports multiple layers and alpha channel editing. Whilst it is based around the GIMP's technology and uses the same native file format, unlike the GIMP, Seashore only aims to serve the basic image editing needs of most computer users, not to provide a replacement for professional image editing products.

**Skitch:** The Internet age's Camera and it Rocks! Everyday we all share images, ideas and have fun with friends online — this should be easy... Skitch makes it so.
