

Bruce 1V2 -- Spawn of Frugel-Horn
FE207e BVR/Double Mouth Horn
Sheet 0 -- panel placement
designed by Scott Lindgren
drawn by dld
14-august-2007

Notes:

0/ drawn using 3/4" (19mm) material

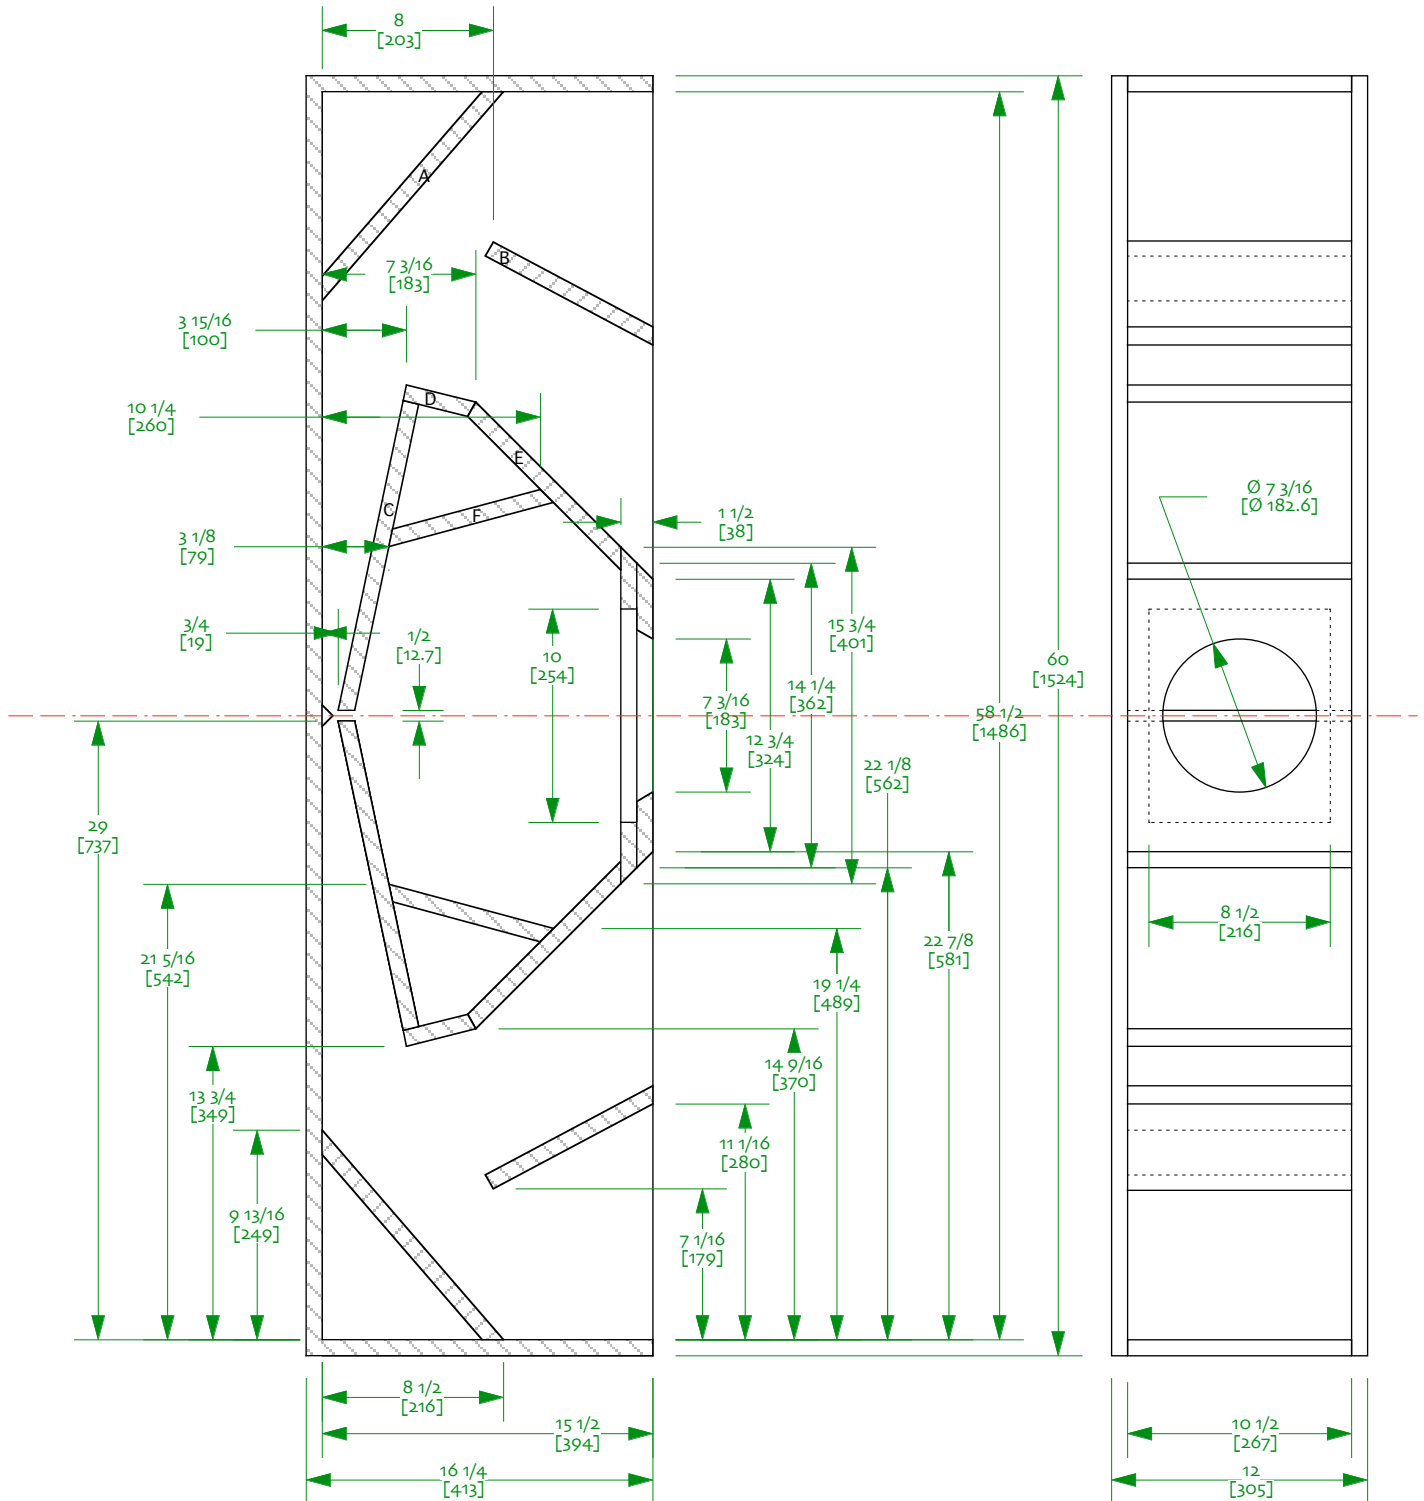

1/ also suited fro a range of other 8" (200mm) drivers

2/ mouth brace (B) is optional and not size critical

3/ The purpose of piece F is to reduce the CC volume to ~35 litres. It could be left out and instead 583 in³ (9.6 litres) of random scraps could be glued to all the interior CC walls to give the same volume with a much less regular interior shape

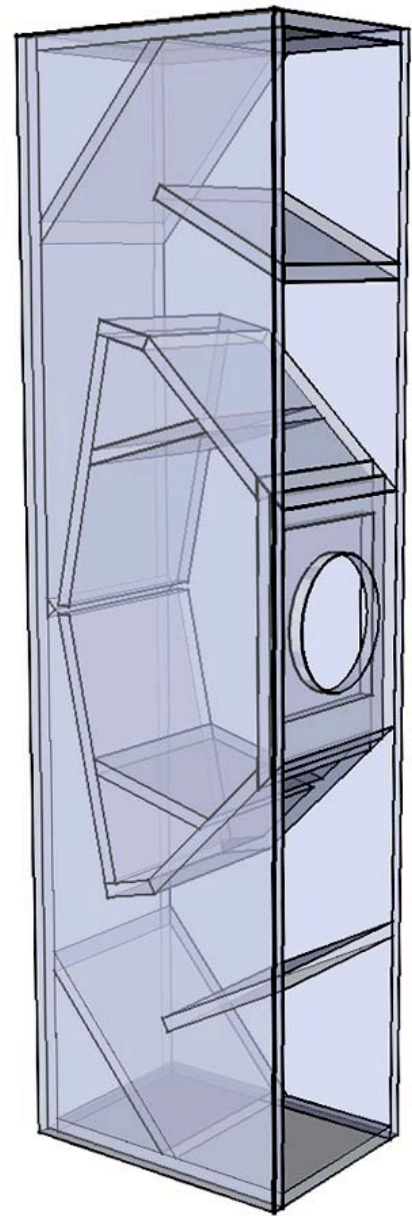

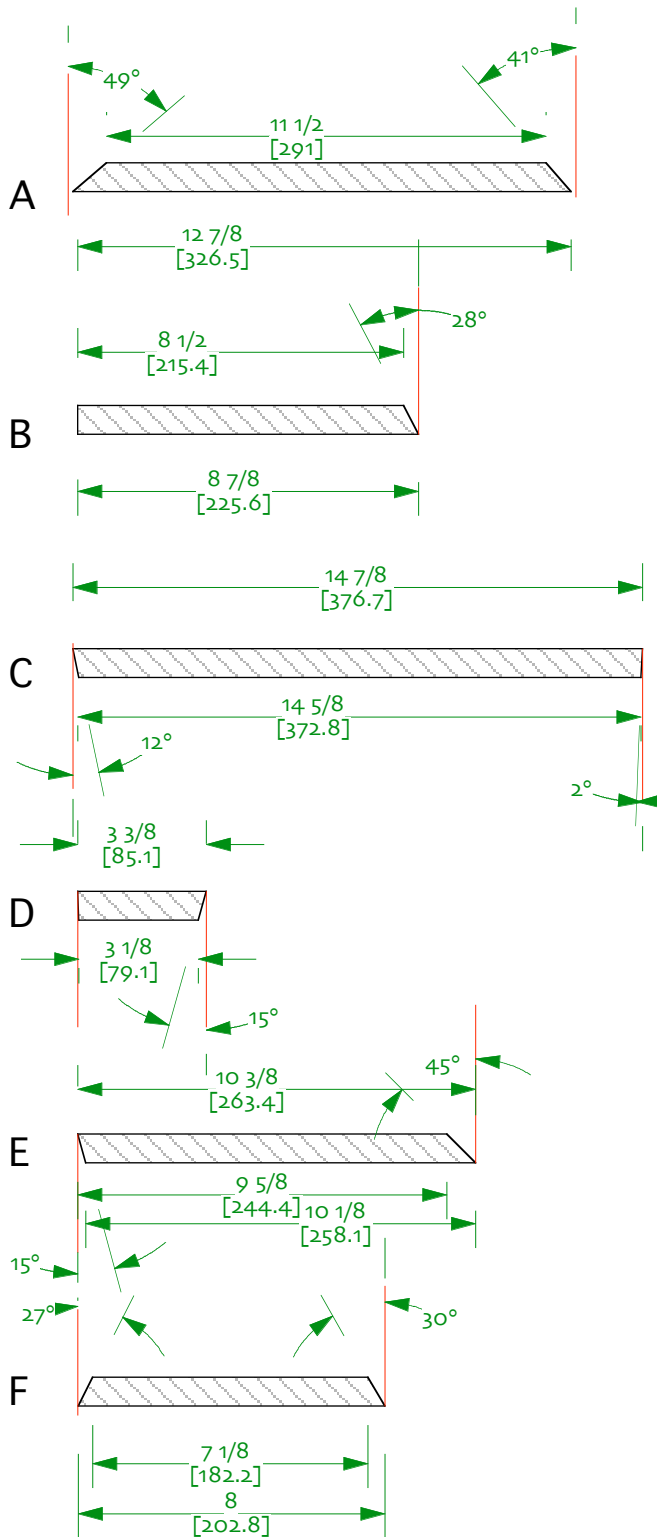

4/ the little triangle right in the throat is also optional. It is a 1x1 (25x25mm) ripped along the diagonal.

5/ size of the rectangular cutout in the subBaffle is not critical

Bruce 1V2 -- Spawn of Frugel-Horn
FE207e BVR/Double Mouth Horn
Sheet 1 -- internal panel details
designed by Scott Lindgren
drawn by dld
14-august-2007

Notes:

0/ drawn using 3/4" (19mm) material

1/ all these panels are 10 1/2" (267mm) long

2/ actual measured angles -- space filing glue & a file should do the trick on some of them
